AMENDMENTS TO THE CLAIMS

The following listing of claims will replace all prior versions, and listings, of claims in this application.

Listing of Claims

Claims 1-16 (canceled).

Claim 17 (currently amended): A wrapping body comprising: the an interlabial pad having longitudinal and lateral directions appropriate for insertion between the labia of a wearer, as claimed in claim 7, an interlabial pad body for absorbing body fluid, and a pair of flap portions provided on the interlabial pad body to extend beyond the side edges of the interlabial pad body in the lateral direction,

wherein said interlabial pad body has a surface side sheet disposed on the body side for contacting the skin of the wearer and a backside sheet disposed opposite to the surface side sheet, and the surface side sheet and the backside sheet are bonded together at the peripheral edges thereof to enclose an absorbent body for absorbing said body fluid,

wherein the pair of the flap portions is provided with a surface for contacting the skin of the wearer, and said surface has an adhesive portion,

the pad comprising a mini-sheet piece which forms a finger insertion opening having a finger breadth opening secured and a finger insertion space continuing therefrom,

wherein the mini-sheet piece is attached to an opposite side face to a body side face of the interlabial pad body,

the wrapping body comprising a wrapping container that wraps the interlabial pad, wherein the flap portions provided on the interlabial pad are temporarily fixed detachably to an inner face of the wrapping container, and

wherein the interlabial pad is folded and contained such that the finger insertion opening opens when the wrapping container is unsealed.

Claim 18 (currently amended): The wrapping body according to claim 16 comprising:

{W:\20050\0200468us0\0057143E.DOC [REDACTED]}

3

Docket No.: 20050/0200468-US0

an interlabial pad;  
a wrapping container that contains the interlabial pad;  
the interlabial pad comprising an interlabial pad body for absorbing body fluid and a pair of flap portions provided on the interlabial pad body to extend beyond the side edges of the interlabial pad body in the lateral direction,  
wherein said interlabial pad body has a surface side sheet disposed on the body side for contacting the skin of the wearer and a backside sheet disposed opposite to the surface side sheet, and the surface side sheet and the backside sheet are bonded together at the peripheral edges thereof to enclose an absorbent body for absorbing said body fluid,  
wherein the pair of the flap portions is provided with a surface for contacting the skin of the wearer, and said surface has an adhesive portion,  
wherein the pair of flap portions provided on the interlabial pad is temporarily fixed detachably to an inner face of the wrapping container,  
wherein the wrapping container comprises a series of wrapping sheets folded so as to form an overlapped region which is overlapped by itself in a portion of the series of wrapping sheets, and  
wherein the inner face to which the flap portions are temporarily fixed comprises an inner portion of a face having both side edges to form the overlapped portion.
